The diagram shows a curved path with an arrow indicating direction. A vector field of small squares is shown, with an arrow pointing to the right. A particle trajectory is shown as a series of circles moving along the path.

3.

A diagram of a 2D hexagonal lattice. A central unit cell is highlighted with a thick black border. This unit cell contains a small circle with a dot in the center and a small square with a dot in the center. The lattice is composed of many such unit cells. A curved line passes through the lattice, and a small circle with a dot is shown on this line. Below the lattice, a vertical line with a curved arrow indicates a direction of movement or a path.
